Hi Rick -

Thanks for the email. EPA has been invited to attend the Flathead County Board of Health meeting next week to update the board on our site work. Regarding CFAC site activity, we aren't aware of any activity at the site. We'll look to work with the potentially responsible parties to lead the environmental investigation with EPA oversight, but right now, our next steps are to accept comments on the proposal to add the CFAC site to the National Priorities List.

Thanks Rick,  
Rob

I understand you might be in the Columbia Falls area on April 16 perhaps to start looking over the CFAC site. Don't bring your skis, the local ski hill will be closed. We had an El Nino end to the season anyway.

If you were to see some activity in the CFAC site that would be of interest to the community, would you be able to report that to the media? I'm thinking about activity by a demolition company, or if CFAC gave you documents stating their plans to begin demolition soon. We're thinking CFAC might go ahead and get the buildings removed and leave the landfills for a later day. If so, that would be big news for locals.

Thanks for your help.
